About The Facilitator

Dr. Ebenezer Larnyo, a postdoctoral scholar at the CBSR, with a Ph.D. in Management Science and Engineering, specializes in data-driven healthcare frameworks that enhance quality of life and access to care. His expertise includes using healthcare technologies and data science to address disparities and improve patient outcomes.

About The Workshop

This workshop will introduce participants to the interplay between environmental exposures and racial disparities in health outcomes. Attendees will learn how to model environmental data and integrate race as a critical variable to identify inequities and inform policy interventions.

This event will be recorded.
