STUDENT ENGAGEMENT AND ENRICHMENT IN DATA SCIENCE (SEEDS)
BLACK RESEARCHERS ADVANCING INTELLIGENCE IN NEUROCOMPUTATION (BRAIN)

PROGRAM

A DATA SCIENCE Living and Learning community for UCSB students (including incoming Freshman and Transfer). This program will draw the interest of prospective and current students that prioritize professional outcomes, small cohort-based learning, and opportunities for interdisciplinary and convergent learning. This is an opportunity for UCSB student populations to deeply understand and potentially make meaningful contributions in data science with goals to study ethics, how data is conceptualized and utilized in STEM, Social Sciences and Humanities. Our focus is to approach data science through workshops, conversations, mini lectures with a goal of integrating data science towards formal instruction in diverse disciplines.

COLLABORATORS
SHARON TETTEGAH, PHD., BLACK STUDIES
KENNETH KOSIK, MOLECULAR, CELLULAR & DEVELOPMENTAL BIOLOGY, NEUROSCIENCE
DAVID LOW, PHD., MOLECULAR CELLULAR DEVELOPMENTAL BIOLOGY
TIM SHERWOOD, PHD., COMPUTER SCIENCE
YEKATERINA KHARITONOVA, PHD., COMPUTER SCIENCE
MICHAEL LUDKOFSKI, PHD., STATISTICS & PROBABILITY
KATHY FOLTZ, PHD., MOLECULAR CELLULAR DEVELOPMENTAL BIOLOGY
PAIGE MILLER, PHD., MARINE SCIENCE INSTITUTE
JON JOBLANSKI, INTERDISCIPLINARY RESEARCH COLLABORATORY, UCSB LIBRARY
MARIAN BANKINS, HOUSING, DINING AND AUXILIARY ENTERPRISES
MARCUS MATHIS, ADMISSIONS AND OUTREACH
